Collagen Sheets

Primary Dressing

Sterile, single-use dressings composed of purified collagen. Designed to help manage partial and full-thickness wounds by maintaining a moist wound environment that supports the body’s natural healing processes. These sheets conform well to flat wound beds and may be used on chronic ulcers, surgical sites, and other slow-healing wounds.

Size	2" x 2"	7" x 7"
HCPCS	A6021	A6023
Drainage	Light to moderate	Light to moderate

Collagen Powder

Primary Dressing

Sterile collagen powder intended for use on lightly to moderately exudating wounds. Supports a moist wound environment that facilitates the body’s normal healing response. Conforms to wound contours and may be used in tunneling or irregular wound beds. Single-use only. Suitable for ulcers, surgical wounds, and partial-thickness injuries as directed by clinical judgment.

Size	1 gram per packet
HCPCS	A6010
Drainage	Light to moderate

Non-adherent Layer

Protect the wound with a non-stick layer.

Super Absorbent, Hydrocapillary Layer

A wound care dressing designed to rapidly promote healing in acute/chronic wounds.

Non-adherent Layer

Protect the wound with a non-stick layer.

XLTA IS A 2-IN-1 DRESSING
INTEGRATING A SUPER
ABSORBENT PAD SANDWICHED
BETWEEN TWO NON-ADHERENT
LAYERS TO PREVENT STICKING TO
THE WOUND BED.

XLta Dressing

Primary Dressing

The XLTA® Cure Wound Care Range is an innovative advanced wound care dressing designed to manage exudate, prepare the wound bed, and support the body's natural healing processes. XLTA® technology effectively draws out exudate, devitalized tissue, and other components that delay the wound healing process, dispersing them omnidirectionally within the dressing for optimal wound management.

Size	2" x 2"	4" x 4"	6" x 8"
HCPCS	A6196	A6196	A6197
Drainage	Moderate to heavy	Moderate to heavy	Moderate to heavy

Calcium Alginate Dressings

Primary Dressing

Highly absorbent wound dressings made from natural alginate fibers. On contact with wound exudate, the dressing forms a soft gel that helps maintain a moist wound environment. Intended for use on moderate to heavily draining wounds including ulcers, donor sites, and pressure injuries. Conforms easily to wound contours and may be used under compression as directed.

Size	2" x 2"	4" x 8"
HCPCS	A6196	A6197
Drainage	Moderate to Heavy Only	Moderate to Heavy Only

Silver Alginate Dressings

Primary Dressing

Alginate dressings that contain ionic silver. Designed to absorb moderate to heavy exudate while helping to manage the wound environment. Appropriate for wounds that are at risk of infection or have signs of local contamination. Helps support a clean wound bed while maintaining moisture balance.

Size	2" x 2"	4" x 8"
HCPCS	A6196	A6197
Drainage	Moderate to Heavy Only	Moderate to Heavy Only

Bordered Gauze Dressings

Tertiary Dressing

Sterile adhesive dressings with a soft, absorbent center pad and breathable backing. The gentle adhesive border secures the dressing in place while protecting periwound skin. Designed for wounds with light to moderate drainage, including surgical incisions and skin tears. Water-resistant outer layer provides added protection from external moisture.

Size	4" x 4"	6" x 8"
HCPCS	A6219	A6220
Drainage	No drainage requirement	No drainage requirement

Standard Gauze Dressing

Secondary Dressing

Our non-sterile standard gauze is crafted from 100% woven cotton, available in convenient 2x2 or 4x4 inch 8-ply squares. Designed for single use, its reduced linting makes it ideal for a multitude of applications, including general wound cleaning, prepping, packing, and debriding, ensuring effective care without the use of natural rubber latex.

Size	4" x 4"	2" x 2"
HCPCS	A6216	A6216
Drainage	No drainage requirement	No drainage requirement

Rolled Gauze

Tertiary Dressing

Soft, sterile gauze rolls designed to gently secure wound dressings and support light compression. The conforming weave allows the gauze to stretch and adapt to body contours, providing flexible coverage for hard-to-wrap areas. Ideal for holding primary dressings in place or providing additional protection over wounds. Individually packaged and latex-free for patient safety.

Size

2" x 6 yards (more sizes coming soon)

HCPCS

A6445

Drainage

No drainage requirement

ABD Pads

Secondary Dressing

Multi-layer absorbent pads designed to cover large wounds or areas with significant drainage. May be used as a secondary dressing or wound cover. The pad's construction helps manage exudate and protect the wound site. Sterile and latex-free.

Size	4" x 4"	6" x 8"
HCPCS	A6252	A6253
Drainage	No drainage requirement	No drainage requirement

Wound Cleanser

Topical Wound Cleansers

Non-cytotoxic, non-irritating wound cleanser intended for mechanical cleansing of wound surfaces. Helps flush out dirt and debris during dressing changes. Suitable for use on acute and chronic wounds, including ulcers, abrasions, and post-surgical sites. Safe for routine use when directed by clinical protocol.

Size	8 oz
HCPCS	A6260
Drainage	No drainage requirement

Medical Tape (Paper)

Tertiary Dressing

Breathable paper tape designed to secure dressings and medical devices in place. Hypoallergenic and gentle on the skin, making it ideal for sensitive or fragile areas. Tears easily by hand and leaves minimal residue. Commonly used in post-operative care or with frequent dressing changes.

Size	1" x 10 yds
HCPCS	A4450
Drainage	No drainage requirement
